Convert audio files to mp3 using ffmpeg

[Ask Question](#)

I need to convert audio files to mp3 using ffmpeg.

When i write the command as `ffmpeg -i audio.ogg -acodec mp3 newfile.mp3`, I get the error:

```
FFmpeg version 0.5.2, Copyright (c) 2000-2009 Fabrice Bellard, et al.
configuration:
  libavutil      49.15. 0 / 49.15. 0
  libavcodec     52.20. 1 / 52.20. 1
  libavformat    52.31. 0 / 52.31. 0
  libavdevice    52.  1. 0 / 52.  1. 0
  built on Jun 24 2010 14:56:20, gcc: 4.4.1
Input #0, mp3, from 'ZHRE.mp3':
  Duration: 00:04:12.52, start: 0.000000, bitrate: 208 kb/s
  Stream #0.0: Audio: mp3, 44100 Hz, stereo, s16, 256 kb/s
Output #0, mp3, to 'audio.mp3':
  Stream #0.0: Audio: 0x0000, 44100 Hz, stereo, s16, 64 kb/s
Stream mapping:
  Stream #0.0 -> #0.0
Unsupported codec for output stream #0.0
```

I also ran this command :

```
ffmpeg -formats | grep mp3
```

and got this in response:

```
FFmpeg version 0.5.2, Copyright (c) 2000-2009 Fabrice Bellard, et al.
configuration:
  libavutil      49.15. 0 / 49.15. 0
  libavcodec     52.20. 1 / 52.20. 1

text2movsub remove_extra noise mov2textsub mp3decomp mp3comp mjpegadump imxdump
h264_mp4toannexb dump_extra
```

I guess that the mp3 codec isnt
